

ABS FRESH

**THE BEST CLOUD BASED SOFTWARE
FOR FRESH PRODUCERS**

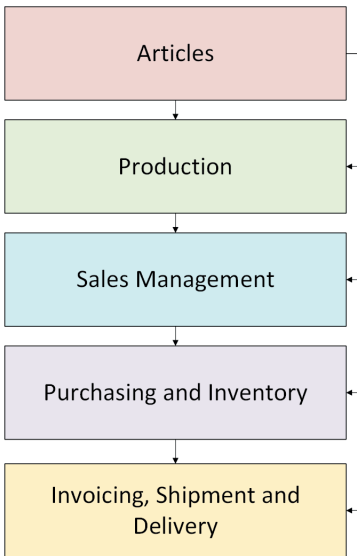

WWW.AGROSOLUTIONS.NL

ABS Fresh

For those deeply rooted in the Fresh production business, effectively managing the intricate complexity of fresh produce, especially grafting activities, is paramount.

ABS Fresh is a comprehensive solution designed to track the entire lifecycle of a fresh produce business, from customer management and production to inventory, sales, and delivery. With robust quality management features for fruit, vegetable, and floral products, it is the ideal choice for crop producers with complex operational structures.

ABS FRESH System Flow chart
