

ABS

Production

NEW

ABS PRODUCTION is the web-based software solution for seed production and multiplication companies. ABS Production can be used in both smaller family businesses or mid-sized companies all over the world.

With ABS Production you can manage:

- Relations
- Contracts
- Fields
- Varieties
- Lots
- Field inspections
- Crop reports
- Inventory
- Quality results
- and Grower Settlements

ABS – Helping you grow!

YOU ARE A SEED PRODUCTION COMPANY AND ...

- You want to use a modern software to register your seed productions in the field
- You want to keep track of all data in one database, with a track record of all changes done in one database
- You want your data secured in data centres with frequent backups!
- You want to use an (off-line) App to register your field inspection data with photos, quantity and quality information on a tablet and upload to the system
- You want to update your customers with informative crop reports
- You want to have overview of all your productions
- You want to have a software which is maintained and supported by a company, which knows your business

ABS Production - Your Software Solution!

ABS PRODUCTION INCLUDES THE FOLLOWING MODULES:

Module	Functionality
Admin	Control of all settings, for instance users, tests etc.
Company	CRM of all customers and growers
Location	List of all Fields and Locations
Lot	The unique combination of a Variety on a certain Location
Variety	List of all Varieties
Test	Field Inspections and Quality tests on seed lots
Inventory	Basic registration of all seed inventory
Contract	All information on Customer and Grower contracts

WHY CHOOSE ABS PRODUCTION?

- Web based
- Very flexible to configure and make a fit with your business process
- More extensive registration options than Excel
- Ability to work all together in one system and no risk of individual interpretation
- Consistent data (changes to data update every linked record)
- Very user-friendly
- Realtime overviews
- Easy implementation in short implementation time
- Servicedesk to support you with all your questions

WHY ABS

- Advice on business optimization and processes
- Service desk, all office hours
- Regular software updates
- Customizations will not be lost when upgrading to a new version
- We know your business!

ABS has been providing organizational advice and standard software solutions specifically for agriculture for more than 20 years.

Our solutions are implemented with breeding companies, seed multiplication companies and fresh produce companies.

Our customers are world-leading companies in their sector and are mostly active in field crops, vegetables and flowers. The software can handle all product types such as seeds, bulbs, plugs and composed products.
