

ABS SEED ERP

ABS Seed

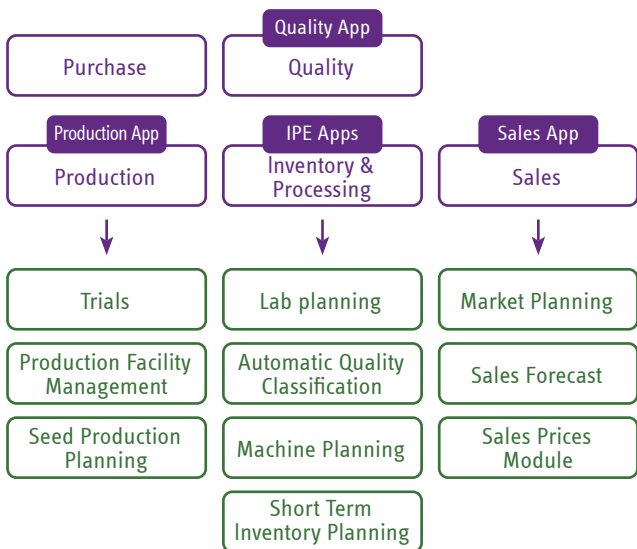

ABS SEED is the software solution for seed breeding, -multiplication, -processing and seed distribution companies that are active locally or across the world.

ABS Seed Apps

ABS Seed can be used in both smaller family businesses and global enterprises. That is why ABS Seed can be supplied as an enterprise edition, as well as a small business edition.

ABS Seed basic modules:

- Production
- Inventory & Processing
- Quality
- Purchase
- Sales

The ABS Enterprise edition contains all modules.

The ABS Small Business edition contains the 5 basic modules (purple) and the green modules are optional.

Module	Functionality
Purchase	for companies who (also) purchase seed or other materials from an external party
Quality	provides a complete and detailed overview of all quality data
Production	to support and manage the multiplication of your seeds in contracts and fields
Inventory & Processing	automates the processing of seed based on work-at-hand, inventory and capacity. Gives an overview of available stock for sales
Sales	provides the sales department with an easy method of placing an order reservation, a booking and delivery. The system shows the actual saleable stock, taking into account the inventory and forecast

Also available: Analysis tools, Connects and Apps
